Lecture Notes in Computer Science

The series reports on the development of computer science research and is not primarily intended for a high level. The disciplines of computer science were important and it is felt that it is being brought to the public. This type of material considered for publication include:

- results of original papers or monographs,
- technical reports of high quality and broad interest,
- advanced-level lectures,
- reports of meetings, provided they are of exceptional interest and focused on a single topic.

Publication of Lecture Notes is intended as a service to the computer science community in that the publisher Springer-Verlag offers global distribution of documents which would otherwise have a restricted readership. Once published and copyrighted they can be cited in the scientific literature.

Manuscripts

Lecture Notes are printed by photo-offset from the master copy delivered in camera-ready form. Manuscripts should consist of no fewer than 100 and preferably no more than 500 pages of text. Authors of monographs and editors of proceedings volumes receive 50 free copies of their book. Manuscripts should be printed with a laser or other high-resolution printer onto white paper of reasonable quality. To ensure that the final photo-reduced pages are easily readable, please use one of the following formats:

Font size (points)	Printing area		Final size %
	(cm)	(inches)	
10	12.2 x 19.3	4.8 x 7.6	100
12	15.3 x 24.2	6.0 x 9.5	80

On request the publisher will supply a leaflet with more detailed technical instructions or a T_EX macro package for the preparation of manuscripts.

Manuscripts should be sent to one of the series editors or directly to:

Springer-Verlag, Computer Science Editorial III, Tiergartenstr.17,
D-69121 Heidelberg, Germany

Journal of Computer Science

The journal reports new developments in computer science in a timely and informal manner. The line between research and review is blurred. Papers should be of high scientific quality. The type of material considered for publication includes:

- drafts of original papers or monographs,
- technical reports of high quality and broad interest,
- an accessible set of lectures,
- reports of meetings, provided they are of exceptional interest and focused on a single topic.

Publication of Lecture Notes is intended as a service to the computer science community in that the publisher Springer-Verlag offers global distribution of documents which would otherwise have a restricted readership. Once published and copyrighted they can be cited in the scientific literature.

Preface

Ten years ago, the inaugural European Conference on Computer Vision was held in Antibes, France. Since then, ECCV has been held biennially under the auspices of the European Vision Society at venues around Europe. This year, the privilege of organizing ECCV 2000 falls to Ireland and it is a signal honour for us to host what has become one of the most important events in the calendar of the computer vision community.

ECCV is a single-track conference comprising the highest quality, previously unpublished, contributed papers on new and original research in computer vision. This year, 266 papers were submitted and, following a rigorous double-blind review process, with each paper being reviewed by three referees, 116 papers were selected by the Programme Committee for presentation at the conference.

The venue for ECCV 2000 is the University of Dublin, Trinity College. Founded in 1592, it is Ireland's oldest university and has a proud tradition of scholarship in the Arts, Humanities, and Sciences, alike. The Trinity campus, set in the heart of Dublin, is an oasis of tranquility and its beautiful squares, elegant buildings, and tree-lined playing-fields provide the perfect setting for any conference.

The organization of ECCV 2000 would not have been possible without the support of many people. In particular, I wish to thank the Department of Computer Science, Trinity College, and its head, J. G. Byrne, for hosting the conference secretariat. Gerry Lacey, Damian Gordon, Niall Winters, Mary Murray, and Dermot Furlong provided unstinting help and assistance whenever it was needed. Sarah Campbell and Tony Dempsey in Trinity's Accommodation Office were a continuous source of guidance and advice. I am also indebted to Michael Nowlan and his staff in Trinity's Information Systems Services for hosting the ECCV 2000 web-site. I am grateful too to the staff of Springer-Verlag for always being available to assist with the production of these proceedings. There are many others whose help – and forbearance – I would like to acknowledge: my thanks to all.

Support came in other forms too, and it is a pleasure to record here the kind generosity of the University of Freiburg, MV Technology Ltd., and Captec Ltd., who sponsored prizes for best paper awards.

Finally, a word about conferences. The technical excellence of the scientific programme is undoubtedly the most important facet of ECCV. But there are other facets to an enjoyable and productive conference, facets which should engender conviviality, discourse, and interaction: my one wish is that all delegates will leave Ireland with great memories, many new friends, and inspirational ideas for future research.

Contents of Volume I

Recognition & Modelling I

- Non-linear Bayesian Image Modelling 3
C. Bishop, J. Winn
- Unsupervised Learning of Models for Recognition 18
M. Weber, M. Welling, P. Perona
- Learning Over Multiple Temporal Scales in Image Databases 33
N. Vasconcelos, A. Lippman
- Colour Image Retrieval and Object Recognition Using the Multimodal
 Neighbourhood Signature 48
J. Matas, D. Koubaroulis, J. Kittler

Stereoscopic Vision

- Approximate N-View Stereo 67
K. Kutulakos
- A Minimal Set of Constraints for the Trifocal Tensor 84
N. Canterakis
- Intrinsic Images for Dense Stereo Matching with Occlusions 100
C. Silva, J. Santos-Victor

Recognition & Modelling / Stereoscopic Vision / Texture, Shading, & Colour

- Local Scale Selection for Gaussian Based Description Techniques 117
O. Chomat, V. Colin de Verdière, D. Hall, J. Crowley
- Anti-Faces for Detection 134
D. Keren, M. Osadchy, C. Gotsman
- Combining Elastic and Statistical Models of Appearance Variation 149
T. Cootes, C. Taylor
- Object Recognition Using Coloured Receptive Fields 164
D. Hall, V. Colin de Verdière, J. Crowley
- Learning Similarity for Texture Image Retrieval 178
G. Guo, S. Li, K. Chan

Parametric View-Synthesis	191
<i>M. Hansard, B. Burton</i>	
Least Commitment Graph Matching by Evolutionary Optimisation	203
<i>R. Myers, E. Hancock</i>	
Predicting Disparity Windows for Real-Time Stereo	220
<i>J. Mulligan, K. Daniilidis</i>	
On the Estimation of the Fundamental Matrix: A Convex Approach to Constrained Least-Squares	236
<i>G. Chesi, A. Garulli, A. Vicino, R. Cipolla</i>	
Velocity-Guided Tracking of Deformable Contours in Three Dimensional Space	251
<i>R. Zaritsky, N. Peterfreund, N. Shimkin</i>	
Model Based Pose Estimator Using Linear-Programming	267
<i>M. Ben-Ezra, S. Peleg, M. Werman</i>	
Measuring the Self-Consistency of Stereo Algorithms	282
<i>Y. Leclerc, Q. Luong, P. Fua</i>	
Log-polar Stereo for Anthropomorphic Robots	299
<i>E. Grosso, M. Tistarelli</i>	
Contour-Based Correspondence for Stereo	314
<i>S. Alibhai, S. Zucker</i>	
Color and Scale: The Spatial Structure of Color Images	331
<i>J. Geusebroek, R. van den Boomgaard, A. Smeulders, A. De</i>	
Constrained Dichromatic Colour Constancy	342
<i>G. Finlayson, G. Schaefer</i>	
Objective Colour from Multispectral Imaging	359
<i>E. Angelopoulou</i>	
Colour by Correlation in a Three-Dimensional Colour Space	375
<i>K. Barnard, L. Martin, B. Funt</i>	
Improvements to Gamut Mapping Colour Constancy Algorithms	390
<i>K. Barnard</i>	
Gray Scale and Rotation Invariant Texture Classification with Local Binary Patterns	404
<i>T. Ojala, M. Pietikäinen, T. Mäenpää</i>	
Adapting Spectral Scale for Shape from Texture	421
<i>E. Ribeiro, E. Hancock</i>	

Recognition & Modelling II

Learning to Recognize 3D Objects with SNoW..... 439
M.-H. Yang, D. Roth, N. Ahuja

Region-Based Object Recognition Using Shape-from-Shading 455
P. Worthington, E. Hancock

Recognizing Walking People 472
S. Carlsson

A Probabilistic Sensor for the Perception and Recognition of Activities ... 487
O. Chomat, J. Martin, J. Crowley

Structure from Motion I

Homography Tensors: On Algebraic Entities that Represent Three Views
of Static or Moving Planar Points 507
A. Shashua, L. Wolf

Plane + Parallax, Tensors and Factorization..... 522
B. Triggs

Factorization with Uncertainty 539
M. Irani, P. Anandan

Estimating the Jacobian of the Singular Value Decomposition: Theory and
Applications..... 554
T. Papadopoulos, M. Lourakis

Shape

Diffeomorphic Matching Problems in One Dimension: Designing and
Minimizing Matching Functionals 573
A. Trounev, L. Younes

Level Sets and Distance Functions 588
J. Gomes, O. Faugeras

Divergence-Based Medial Surfaces..... 603
S. Bouix, K. Siddiqi

Structure from Motion / Shape / Image Features

3D Reconstruction from Tangent-of-Sight Measurements of a Moving
Object Seen from a Moving Camera 621
D. Segal, A. Shashua

A Six Point Solution for Structure and Motion..... 632
F. Schaffalitzky, A. Zisserman, R. Hartley, P. Torr

Reconstruction from Uncalibrated Sequences with a Hierarchy of Trifocal Tensors	649
<i>D. Nistér</i>	
Characterizing Depth Distortion due to Calibration Uncertainty	664
<i>L. Cheong, C. Peh</i>	
On Calibration and Reconstruction from Planar Curves	678
<i>J. Kaminski, A. Shashua</i>	
How Does CONDENSATION Behave with a Finite Number of Samples? ..	695
<i>O. King, D. Forsyth</i>	
On the Structure and Properties of the Quadrifocal Tensor	710
<i>A. Shashua, L. Wolf</i>	
Geotensity Constraint for 3D Surface Reconstruction under Multiple Light Sources	725
<i>A. Maki, C. Wiles</i>	
Noise-Resistant Affine Skeletons of Planar Curves	742
<i>S. Betelu, G. Sapiro, A. Tannenbaum, P. Giblin</i>	
Shape and Radiance Estimation from the Information-Divergence of Blurred Images	755
<i>P. Favaro, S. Soatto</i>	
Surface Matching with Large Deformations and Arbitrary Topology: A Geodesic Distance Evolution Scheme on a 3-Manifold	769
<i>E. Huot, H. Yahia, I. Cohen, I. Herlin</i>	
Duals, Invariants, and the Recognition of Smooth Objects from their Occluding Contours	784
<i>D. Renaudie, D. Kriegman, J. Ponce</i>	
On Utilising Template and Feature-Based Correspondence in Multi-view Appearance Models	799
<i>S. Romdhani, A. Psarrou, S. Gong</i>	
Wide Baseline Point Matching Using Affine Invariants Computed from Intensity Profiles	814
<i>D. Tell, S. Carlsson</i>	
Determining Correspondences for Statistical Models of Appearance	829
<i>K. Walker, T. Cootes, C. Taylor</i>	
Approximation and Processing of Intensity Images with Discontinuity-Preserving Adaptive Triangular Meshes	844
<i>M. García, B. Vintimilla, A. Sappa</i>	

Scale Dependent Differential Geometry for the Measurement of Center Line and Diameter in 3D Curvilinear Structures	856
<i>G. Streekstra, R. van den Boomgaard, A. Smeulders</i>	
Fast Selective Detection of Rotational Symmetries Using Normalized Inhibition	871
<i>B. Johansson, G. Granlund</i>	
Structure from Motion II	
Multibody Structure and Motion: 3-D Reconstruction of Independently Moving Objects	891
<i>A. Fitzgibbon, A. Zisserman</i>	
Integrating Local Affine into Global Projective Images in the Joint Image Space	907
<i>P. Anandan, S. Avidan</i>	
Ambiguous Configurations for 3-View Projective Reconstruction	922
<i>R. Hartley</i>	
On the Reprojection of 3D and 2D Scenes Without Explicit Model Selection	936
<i>A. Shashua, S. Avidan</i>	
Author Index	951

Contents of Volume II

Active, Real-Time, & Robot Vision	
Partitioned Sampling, Articulated Objects, and Interface-Quality Hand Tracking	3
<i>J. MacCormick, M. Isard</i>	
Real-Time Tracking of Multiple Articulated Structures in Multiple Views .	20
<i>T. Drummond, R. Cipolla</i>	
Pedestrian Detection from a Moving Vehicle	37
<i>D. Gavrilu</i>	
Vision-Based Guidance and Control of Robots in Projective Space	50
<i>A. Ruf, R. Horaud</i>	
Segmentation & Grouping I	
A General Method for Unsupervised Segmentation of Images Using a Multiscale Approach	69
<i>A. Kam, W. Fitzgerald</i>	
Image Segmentation by Nonparametric Clustering Based on the Kolmogorov-Smirnov Distance	85
<i>E. Pauwels, G. Frederix</i>	
Euclidean Group Invariant Computation of Stochastic Completion Fields Using Shiftable-Twistable Functions	100
<i>J. Zweck, L. Williams</i>	
Active, Real-Time, & Robot Vision / Segmentation & Grouping / Vision Systems Engineering & Evaluation	
Bootstrap Initialization of Nonparametric Texture Models for Tracking ...	119
<i>K. Toyama, Y. Wu</i>	
Quasi-Random Sampling for Condensation	134
<i>V. Philomin, R. Duraiswami, L. Davis</i>	
Tracking Discontinuous Motion Using Bayesian Inference	150
<i>J. Sherrah, S. Gong</i>	
Direction Control for an Active Docking Behaviour Based on the Rotational Component of Log-Polar Optic Flow	167
<i>N. Barnes, G. Sandini</i>	

The Construction of 3 Dimensional Models Using an Active Vision System	182
<i>P. Armstrong, J. Antonis</i>	
Significantly Different Textures: A Computational Model of Pre-attentive Texture Segmentation	197
<i>R. Rosenholtz</i>	
Calibrating Parameters of Cost Functionals	212
<i>L. Younes</i>	
Coupled Geodesic Active Regions for Image Segmentation: A Level Set Approach	224
<i>N. Paragios, R. Deriche</i>	
Level Lines as Global Minimizers of Energy Functionals in Image Segmentation	241
<i>C. Kervrann, M. Hoebeke, A. Trubuil</i>	
A Probabilistic Interpretation of the Saliency Network	257
<i>M. Lindenbaum, A. Berengolts</i>	
Layer Extraction with a Bayesian Model of Shapes	273
<i>P. Torr, A. Dick, R. Cipolla</i>	
Model-Based Initialisation for Segmentation	290
<i>J. Hug, C. Brechbühler, G. Székely</i>	
Statistical Foreground Modelling for Object Localisation	307
<i>J. Sullivan, A. Blake, J. Rittscher</i>	
Nautical Scene Segmentation Using Variable Size Image Windows and Feature Space Reclustering	324
<i>P. Voles, A. Smith, M. Teal</i>	
A Probabilistic Background Model for Tracking	336
<i>J. Rittscher, J. Kato, S. Joga, A. Blake</i>	
On the Performance Characterisation of Image Segmentation Algorithms: A Case Study	351
<i>B. Southall, B. Buxton, J. Marchant, T. Hague</i>	
Statistical Significance as an Aid to System Performance Evaluation	366
<i>P. Tu, R. Hartley</i>	
Segmentation & Grouping II	
New Algorithms for Controlling Active Contours Shape and Topology	381
<i>H. Delingette, J. Montagnat</i>	

Motion Segmentation by Tracking Edge Information over Multiple Frames	396
<i>P. Smith, T. Drummond, R. Cipolla</i>	
Data-Driven Extraction of Curved Intersection Landmarks from Road Traffic Image Sequences	411
<i>K. Mück, H.-H. Nagel, M. Middendorf</i>	
Tracking and Characterization of Highly Deformable Cloud Structures	428
<i>C. Papin, P. Boutheymy, É. Mémin, G. Rochard</i>	
Calibration	
A Unifying Theory for Central Panoramic Systems and Practical Applications	445
<i>C. Geyer, K. Daniilidis</i>	
Binocular Self-Alignment and Calibration from Planar Scenes	462
<i>J. Knight, I. Reid</i>	
The Role of Self-Calibration in Euclidean Reconstruction from Two Rotating and Zooming Cameras	477
<i>E. Hayman, L. de Agapito, I. Reid, D. Murray</i>	
Hand-Eye Calibration from Image Derivatives	493
<i>H. Malm, A. Heyden</i>	
Medical Image Understanding	
Multimodal Elastic Matching of Brain Images	511
<i>A. Roche, A. Guimond, N. Ayache, J. Meunier</i>	
A Physically-Based Statistical Deformable Model for Brain Image Analysis	528
<i>C. Nikou, F. Heitz, J.-P. Armspach, G. Bueno</i>	
Minimal Paths in 3D Images and Application to Virtual Endoscopy	543
<i>T. Deschamps, L. Cohen</i>	
Calibration / Medical Image Understanding / Visual Motion	
Kruppa Equation Revisited: Its Renormalization and Degeneracy	561
<i>Y. Ma, R. Vidal, J. Košecká, S. Sastry</i>	
Registration with a Moving Zoom Lens Camera for Augmented Reality Applications	578
<i>G. Simon, M.-O. Berger</i>	
Calibration of a Moving Camera Using a Planar Pattern: Optimal Computation, Reliability Evaluation, and Stabilization by Model Selection	595
<i>C. Matsunaga, K. Kanatani</i>	

Multi-view Constraints between Collineations: Application to Self-Calibration from Unknown Planar Structures	610
<i>E. Malis, R. Cipolla</i>	
Stereo Autocalibration from One Plane	625
<i>D. Demirdjian, A. Zisserman, R. Horaud</i>	
Can We Calibrate a Camera Using an Image of a Flat, Textureless Lambertian Surface?	640
<i>S. Kang, R. Weiss</i>	
Underwater Camera Calibration	654
<i>J. Lavest, G. Rives, J. Lapresté</i>	
On Weighting and Choosing Constraints for Optimally Reconstructing the Geometry of Image Triplets	669
<i>W. Förstner</i>	
Computation of the Mid-Sagittal Plane in 3D Medical Images of the Brain	685
<i>S. Prima, S. Ourselin, N. Ayache</i>	
Stochastic Tracking of 3D Human Figures Using 2D Image Motion	702
<i>H. Sidenbladh, M. Black, D. Fleet</i>	
Monocular Perception of Biological Motion - Clutter and Partial Occlusion	719
<i>Y. Song, L. Goncalves, P. Perona</i>	
3-D Motion and Structure from 2-D Motion Causally Integrated over Time: Implementation	734
<i>A. Chiuso, P. Favaro, H. Jin, S. Soatto</i>	
Non-parametric Model for Background Subtraction	751
